

Content of Bulletin 121, December 2016

by Volkert Hoogeland

<i>Colophon</i>	<i>Secretary</i>	<i>page 2</i>
<i>Messages from the committee</i>	<i>Secretary</i>	<i>page 3</i>
<i>Sundial in a vertical cylinder</i> A simple approach to the determination of hour and date lines.	<i>F. Maes</i>	<i>page 5</i>
<i>The Zimmer Tower in Lier, Belgium (part 3)</i> There are dials on the tower that show the phase of the moon, the tide and the Zodiac. These dials are explained in this article.	<i>L. Bolsman</i>	<i>page 9</i>
<i>Nuremberg hours: a reaction on the article in bulletin 120</i> The Latin text above the sundial is translated into Dutch and is a kind of a poem. An explanation and argumentation follows about how the grid on the sundial should be interpreted. It differs from the conclusions in the article in bulletin 120.	<i>J. Souverijn</i>	<i>page 12</i>
<i>A reply on te reaction of J. Souverijn and B. Mooy</i> The hour lines for Nuremberg hours appear to be related to antique hour lines.	<i>F. Maes</i>	<i>page 16</i>
<i>Quiz</i> The results of the previous puzzle are published. The sun compass constructed for this location in the previous puzzle is used for a new puzzle.	<i>F. Maes</i>	<i>page 18</i>
<i>The minutes of the meeting on the 24th of September 2016</i>	<i>Secretary</i>	<i>page 21</i>
