Editorial	3	Butterfield dial gnomons - Frans Maes/Mike Cowham	20
On the abolition of the biannual clock shift.		An adaptation of Mike Cowham's article in BSS Bulletin 2018 nr. 3, showing a variety of gnomon designs.	
From the NL Board - Frans Maes	4	Foster-Lambert sundials - part 1 - Han Hoogenraad	24
- The AGM will be held on March 23 in Tricht.		Han Hoogenraad proves that two equiangular dials can result from projecting an equatorial sundial to the horizontal plane. This article considers the first such dial.	
- The excursion will go to the Royal Eise Eisinga Planetarium in Franeker on July 6.		Foreign sundial society conferences - Secretariat	26
- Zon & Tijd will appear four times per year.		Upcoming meetings of the British, German & Austrian, French and North American sundial societies.	
Zarbula's sundials - Michel Lalos (tr. John Souverijn)	5	Solargraph: a half year of sunshine in a can - Lou Güse	27
Translation of Michel Lalos' web page on who the 19th c. sundial maker Zarbula was - or was it Zerbolla? Or were there three of them?		A solargraph is a photo of the daily motion of the sun during half a year. The article also gives details and links about the techniques.	
Zarbula's method - Frans Maes	8	Puzzle - Frans Maes	28
Paul Gagnaire and Michel Ugon have unraveled Zarbula's method of constructing vertical sundials.		The old puzzle asked for the height attained when a rope around the globe is stretched taut. The new puzzle asks which timepiece has the most moving parts.	
An ingenious sundial in Bruges - Wim Boone	10	Report of the meeting of 19 January in Tricht - John Souverijn	30
Wim Boone made a vertical sundial to celebrate the 50th anniversary of his employer, an engineering firm.		Annual report 2018 of De Zonnewijzerkring - John Souverijn	31
Exhibition of sundials from the Max Elskamp collection in the Liège museum - Editors	11	Financial report 2018-2019 of De Zonnewijzerkring - Peter de Groot	32
Some 60 instruments from this illustrious collection will be on display in the Musée de la Vie wallonne until May 12.		Contents of this issue - Editors	34
A cheerful sundial bicycle trip for high school students - Hans Schipper	12	Information on the Netherlands' and Flemish Sundial Societies	35
Hans Schipper took his class on a trip along sundials in the Zutphen region.			
Sundial in a noon gap - Frank King/Frans Maes	15		
Frank King designed a split azimuthal sundial inside the back flap of a book on sundials.			
The Flemish Capuchins as sundial designers and makers - part 4 - Eric Daled	16		
This episode presents another couple of sundials by Amantius of St.-Amands (1748-1826), from Antwerp, Meerle and Essene.
